FAMOC

BY FANCYFON

Enterprise-grade mobility solution. Security without compromise.

FAMOC – Endless Possibilities of Samsung KNOX at Your Fingertips

FAMOC and **Samsung KNOX** – Meeting Enterprise Security Needs

With Android-powered smartphones and tablets spreading across enterprise mobile eco-systems, it is crucial to ensure simple enrollment, secure access to corporate data and real-time control over devices connecting to business network.

The FAMOC and Samsung KNOX solutions satisfy a full range of security needs connected with Android deployment. The combined solution secures businesses from a basic level up to the high security and control needs of government and regulated environments.

FAMOC at a Glance. The Best Platform for Business.

Available as a highly-scalable cloud or on-site solution, FAMOC makes working in the mobile era simple and safe by delivering comprehensive security and management for applications, documents, email, and devices. It is a solid foundation for managing multi-OS devices with ease and efficiency. **Ease of deployment, flexibility and enhanced security are things our customers love about FAMOC**.

Designed with a Focus on Security

FAMOC is built with comprehensive security features that provide IT with powerful, yet simple ways to control all corporate and private devices, data and apps.
The FAMOC platform comes standard with a wide range of functionalities beyond basic password enforcement, remote wipe and monitoring – including blacklisting, establishing BYOD security policies, advance certificate lifecycle management, blocking or selectively wiping devices that are out of compliance or lost.

Smart Management

FAMOC provides all the tools and technologies you need to control every aspect of enterprise mobility — from enrolling devices for use on your corporate network, to configuring settings and managing data access, to deploying and managing apps. FAMOC delivers role-based management and configuration for both corporate and employee-owned devices across all operating systems.

Seamless Integration

With advanced integration capabilities for both integrations with enterprise systems (AD, CA and Exchange) and for integrations using FAMOC WebService API for additional third party integrations, you've got everything you need to embrace mobility and transform your business.

Scalability

Deploy FAMOC in virtually every business environment. From ten devices to ten thousand, corporate-owned or BYOD, enrolling devices is quick, easy and error-free. FAMOC allows actions to be carried out on a single handset as well as performing bulk operations on OS-differentiated groups of devices. Applications are quickly and easily sent remotely or available from corporate appstore.

End-user Self-care and Support. Anything else?

Solving problems has never been easier. With FAMOC, employees have the tools to serve themselves (report lost/stolen device, remotely wipe or locate the device), or can ask IT for technical support. Troubleshooting and diagnostics with remote access takes minutes resulting in decrease in device downtime, higher workforce efficiency and greater user experience.

📱 Enhanced Management of **Samsung KNOX** and **SAFE** devices with **FAMOC**

Samsung KNOX is a new enterprise mobile solution available for selected Samsung devices. It is a is a huge step forward in enabling Android-running devices to be used securely at work. KNOX offers a unique container technology that allows organizations to make sure their corporate data is safe and secure without adversely affecting the user experience.

Laveraging Samsung KNOX and Samsung SAFE technology extends FAMOC comprehensive security features. With FAMOC solution mobile IT teams can manage their data within KNOX container using the same central management and policy tools they use throughout their organization.

🛠 MDM Capabilities
- KNOX container activation and control

- Usage Monitor – manage expenses, set limits and enforce roaming policies
- Security Policies based on group membership or ownership of the device (BYOD Support)
- Role-based Access through Active Directory

▦ Application Management
- Whitelist and Blacklist Apps
- Silently Push/Remove Applications
- Corporate Application Store - only for managed devices
- HelpDesk - Remote Support

🔒 Security
- On-Device/SD Card Encryption
- Enforce Password Settings
- Secure Corporate Email, Intranet and Apps (Per-app VPN)
- Remote Lock/Wipe (including Enterprise Wipe)
- Unique Certificate Installation and Management (strong authentication)

🏆 FAMOC and **Samsung KNOX** Key Benefits

- **Security at the core of our development.** FAMOC enterprise-grade security features allow IT to closely manage corporate data while enabling employees to focus on getting their work done.
- **Complete management.** Powerful features address the full device lifecycle. You can manage large deployments with ease and efficiency.
- **Forward thinking. Transforming businesses** to get the most of mobile technology.
- **Flexibility.** Flexible deployment options can help you quickly integrate FAMOC into your existing infrastructure.
- **Customization.** An easily changeable interface can be tailored to customers' or partners' branding. Multiple languages are supported.

One of the greatest advantages of deploying MDM is the highest level of security. The use of remote access technology enables IT to better serve the employees, which is a very significant added benefit. "
